

BlueCat's QuickStart IPAM

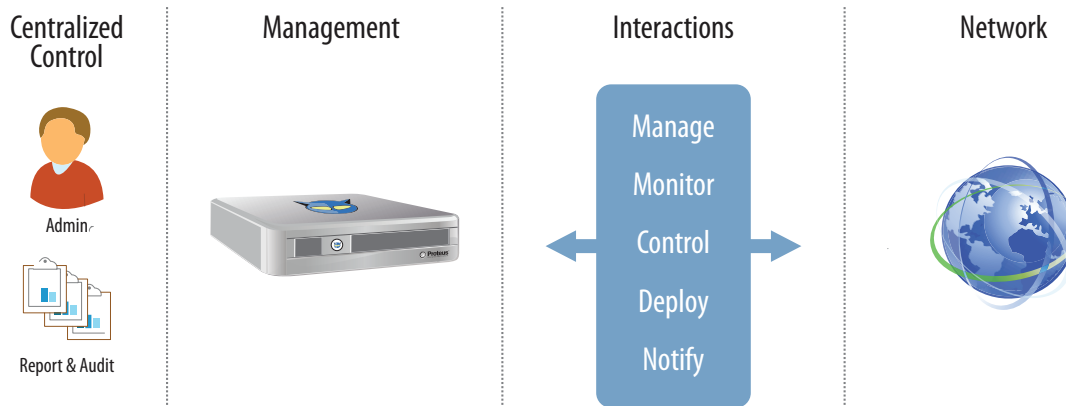

Affordable > Easy to Use > Scalable

Software, 1st Year Support and Training for only \$19,995

Let's face it – your IP volume is quickly expanding and in this dynamic IP world everything depends on up-time. Many administrators are frustrated with spreadsheets, constant DHCP conflicts and struggle to find the next available IP address. All of this delays service rollouts and affects your bottom-line.

You need an affordable, easy to use and scalable IPAM solution. BlueCat Networks is the IPAM market leader with thousands of installations. Our solutions save administrators a great deal of time and money.

With our new Quick Start IPAM Program you can have a complete IPAM solution for your enterprise. This includes a single license of Proteus, capable of managing up to 25,000 IPs, First Year Support, 2 Days of Professional Services, and Virtual Training. **All this for just \$19,995.**

What are the key benefits?

- » Enterprise-wide IP Address Management (IPAM)
- » Total visibility over your IP space from a centralized management platform
- » Automation of your IP tracking & allocation
- » Eliminate IP conflicts
- » Detailed reporting
- » Full network IP discovery & IP reconciliation
- » Detailed auditing

Who should buy this?

If you are currently trying to track and manage IPs with spreadsheets, you need an IPAM solution. BlueCat Networks clients range from SMEs to some of the largest Global Fortune accounts, including classified and unclassified Government Agencies. Our QuickStart program is the best way for you to take control of your IP addresses – without high cost or complexity!
