

## Jumpstart benefits

- Fast, efficient, worry-free deployment
- Consistent approach based on proven best practices
- Continuous knowledge transfer
- Rapid return on investment

## Ready, set, JumpStart

If you're looking to accelerate your deployment of IP Address Management (IPAM), the BlueCat Networks' JumpStart service is designed with you in mind. These engagements leverage proven best practices to help you plan, test and deploy a BlueCat Networks IPAM solution.

With BlueCat Professional Services as your partner, you won't have to go it alone. You can choose to work with a remote or on-site resource to assist with the deployment. Either way, an experienced consultant will guide you through every step of the process – equipping you with the operational knowledge needed to successfully implement and maintain the solution over the long term.

JumpStart will not only help you accelerate your adoption of the BlueCat Networks IPAM solution, but also provide a foundation that will grow with your business.

## The expertise to accelerate your deployment

In each phase of the JumpStart offering, BlueCat Networks consultants will accomplish specific tasks to ensure the solution meets your requirements.

### These tasks include:

- Assessing your current DNS/DHCP implementation
- Configuring the BlueCat Networks IPAM solution
- Migrating in-scope settings and configurations to the BlueCat framework
- Transitioning your production network to the BlueCat Networks IPAM solution
- Educating your staff on IPAM best practices

To supplement the knowledge transfer your staff receives during the IPAM solution deployment, you will also receive two seats to BlueCat Networks' virtual instructor-led training.

*"My CIO described this project as 'perfect'. I am very satisfied and thankful to BlueCat Professional Services for the work that they did. This was the most successful project I've had in my 8-year IT career."*

## JumpStart benefits

Investing in a JumpStart engagement will deliver several key advantages to your organization – from a faster deployment based on industry best practices to continuous knowledge transfer and a rapid return on investment (ROI).

### Fast, efficient, worry-free deployment

You can count on BlueCat Networks Professional Services to accelerate your IPAM solution deployment. With over 300 years of cumulative IT experience, our consultants consistently complete projects on scope and on time, while minimizing organizational risk. In the past year alone, we have helped over 350 clients across a range of industries successfully deploy IPAM, DNS and DHCP solutions.

### Consistent approach based on proven best practices

Each engagement follows a standard methodology that has been proven in deployments for organizations of all sizes. You can trust that your IPAM solution will lay a foundation that supports business growth.

### Continuous knowledge transfer

Working side by side with experienced consultants, your staff will quickly learn best practices for administering your environment. Knowledge transfer doesn't end once the engagement is complete. Your staff has access to additional training so they can continue to hone their skills and become in-house IPAM gurus.

### Rapid return on investment

By streamlining your IPAM solution deployment, you can immediately extract more value from your technology investment.

## Get started today

JumpStart is a unique service offering that helps you accelerate your IPAM solution deployment. Each engagement is based on proven industry best practices, customized to address your specific requirements and capable of delivering the highest possible value for your investment.
