# Intelligent Automation

**The network team is under siege. The cloud, SD-WAN, DevOps, and other large-scale business initiatives are demanding more of your network. The deluge of DNS service requests is getting worse.**

Why not automate those mind-numbing DNS tasks, saving all that time and effort for more meaningful tasks?

Drawing from a centralized repository of DNS records, Intelligent Automation from BlueCat brings order to the chaos. Network teams can meet their SLAs and provide real-time service to stakeholders throughout the organization, all without ceding control over the enterprise.

## Provision IP addresses
through a self-service portal in real time

## Seamlessly integrate
DNS functionality into third-party enterprise tools

## Control
your infrastructure through role-based access

## Use open source workflows
for standard tasks, or build your own

## BlueCat's core DNS platform gets you started:

Build and deploy DNS automation scripts using Python

Robust APIs link any custom application to the DNS back-end

Open source workflows automate standard DNS tasks

Integrate your automated DNS with popular tools such as ServiceNow, Kubernetes CNI, Cisco ACI, Cisco DNA Center, and more

## Implementing automation at scale?
## BlueCat gets you the support you need:

▶ **Support for BlueCat workflows and integrations –** Customize, troubleshoot, and integrate BlueCat's open source workflows and third-party integrations in your specific network environment

▶ **Support for custom workflows –** Receive troubleshooting support for the custom automation workflows built by the BlueCat professional services team

## Unleash Your DNS

Stop counting boxes. Stop paying for unused capacity. Get the capabilities you need, when you need them. DNS Flex is a subscription-based offering which delivers the capabilities you want at the scale you require.
