BLUECAT TRAINING SERVICES

BlueCat Gateway Fundamentals

BlueCat Training Services empower your staff with hands-on training that keeps pace with the design and deployment of your BlueCat solution. BlueCat experts design distinct learning paths to address the comprehensive needs of your IT organization. Our training offerings equip your staff with the skills needed to optimize your BlueCat solution and realize its full potential.

BlueCat Gateway Fundamentals is a full day course designed to focus on customization and self-service to suit the needs of your environment. This course teaches trainees the fundamentals and main uses of Gateway, how to manage workflows, the various customizations available, and how to maintain and troubleshoot common errors. This course is appropriate for IT Support and Network Security Professionals, as well as any other individuals responsible for managing Gateway in their company's environment.

COURSE VENUES

We can arrange for **BlueCat Gateway Fundamentals** to be delivered by one of our instructors wherever your company is located, or you can join us for a BlueCat hosted class in one of our offices

COURSE OBJECTIVES

Upon successful completion of **BlueCat Gateway Fundamentals**, attendees are able to:

- Describe the main uses and benefits of Gateway
- Complete the Gateway installation process
- Import and export BlueCat-created and community-created workflows
- Create custom workflows through Gateway user interface
- Assign workflow permissions to specific user groups
- Understand and edit workflow file
- Solve common errors encountered by Gateway administrators

MODULE 1: GATEWAY FUNDAMENTALS
